

AHMED FERGANEY

Junior Data Analyst | Excel • Power BI • SQL • Python

+20 1091657144 | ahmed.fergane707@gmail.com | Al-Qalyubia, Egypt | linkedin.com/in/ahmed-fergane707 | github.com/ahmedfergane707

PROFILE

Detail-oriented professional with hands-on experience collecting, cleaning, and analyzing data from multiple sources to support business and engineering decisions. Skilled in Microsoft Excel, Power BI, and SQL for building reports and dashboards that surface trends and actionable insights. Strong analytical and problem-solving foundation built across process, operational excellence, and product development roles, combined with working knowledge of Python and statistics for deeper data analysis. Comfortable collaborating with cross-functional teams and maintaining data accuracy and integrity in fast-paced environments.

EDUCATION

B.Sc. in Mechanical Engineering | Banha University | 2016 – 2022

- Academic Standing: Ranked 5th out of 120 in the Mechanical Engineering Department

TECHNICAL SKILLS

Data Analysis & BI: Microsoft Excel (Advanced – formulas, pivot tables, macros), Power BI (dashboards, DAX, data modeling), SQL (queries, joins, data validation), Data Cleaning, Data Visualization, Trend & Pattern Analysis, KPI Reporting

Programming & Statistics: Python (Pandas, NumPy), R (basics), Statistics, Linear Algebra, Data Structures & Algorithms, Bash

Databases: PostgreSQL, MongoDB, Query Optimization, Relational & NoSQL Design

AI & Machine Learning (Additional): Machine Learning, Deep Learning, NLP, LangChain, RAG, Model Deployment — applied in personal data-science projects

Tools: Power BI, MS Office Suite, Postman, Docker, Git/GitHub, Jira, Trello

PROFESSIONAL EXPERIENCE

Data Analyst Engineer | Kandil Glass | 10th of Ramadan City, Egypt | 06/2026 – Present

- Collect, clean, and analyze product and production data from multiple sources to support business and engineering decisions.
- Create Excel reports and Power BI dashboards to track product performance metrics, project KPIs, and operational trends.
- Use SQL to query, validate, and manage structured data, maintaining data accuracy and integrity across reporting systems.
- Identify trends, patterns, and actionable insights from product and quality data to support decision-making.
- Collaborate with R&D, quality, and production teams to meet cross-functional reporting needs and align on KPIs.
- Apply Python for data cleaning and basic analysis, complementing Excel/Power BI workflows on larger datasets.
- Designed and built a star-schema manufacturing data warehouse in Excel (3 fact tables, 8 dimension tables) modeling hourly production, quality sampling, and order inspection data across 7 pressing machines.
- Developed OEE, Efficiency, Pack-to-Melt, First Pass Yield, and Defect Rate KPI calculations from raw production/quality data, then rebuilt them as reusable DAX measures in a multi-page Power BI dashboard for real-time factory monitoring.
- Identified and resolved a data-modeling gap that was discarding individual defect-code detail, redesigning the fact table schema to enable accurate defect Pareto analysis across hourly, daily, and monthly views.

Operational Excellence Engineer | Midea Electric | 6th of October City, Egypt | 02/2025 – 05/2026

- Analyzed operational data and built Power BI dashboards to track KPIs, downtime, and productivity trends.
- Maintained data integrity across reporting sources and automated recurring Excel/SQL-based reports.

Process Quality Engineer | Methode Electronics | Nasr City, Egypt | 12/2023 – 12/2024

- Collected and analyzed quality data to identify defect trends, building Excel reports for cross-functional teams.
- Used SQL to extract and validate data from manufacturing databases, supporting corrective actions and KPI tracking.

Continuous improvement Engineer | Jac | Badr City, Egypt | 03/2023 – 11/2023

- Applied data-driven analysis of production KPIs and process metrics to optimize manufacturing performance, improve OEE, and reduce defects.

RELEVANT DATA PROJECTS

Customer Segmentation using Machine Learning

- Analyzed an automotive dataset using KMeans clustering, Random Forest, and Linear Regression; performed feature engineering, outlier detection (DBSCAN), and dimensionality reduction (PCA) for actionable customer insights.

Bilingual SMS Spam Classification using NLP and Machine Learning

- Built a bilingual (Arabic/English) spam detection system, applying data cleaning, preprocessing, and multiple vectorization methods (Count, N-grams, TF-IDF), validated via cross-validation and feature importance analysis.

CERTIFICATIONS

- Statistics, Linear Algebra, and Numerical Optimization | Dr. Hatem Elattar | 2024
- Machine Learning and Deep Learning Diploma | Eng. Hesham Asem | 2024
- CNN, RNN, LSTM, GRU, and Transformers | Stanford University | 2024
- Database, CCNA, Cloud Computing, Kubernetes, Jenkins, and Redis | Udemy | 2025
- Fundamentals of Backend Engineering | Udemy | 2025
- Prompt Engineering and RAG | Eng. Abu Bakr Soliman | 2026
- Lean Six Sigma Yellow and Green Belt | Udemy | 2022

LANGUAGES & ADDITIONAL SKILLS

Languages: Arabic (Native), English (Professional), German (Basic)

Leadership: Cross-functional Team Leadership, Agile/Scrum Methodologies, Problem-Solving Under Constraints

Programs: Power BI, MS Office, MATLAB, Jira, Trello, Packet Tracer, Cursor
