

Cloud Platform Development

People Develop Countries... We Develop P.E.O.P.L.E.

Program Admission Arrangements

Who May Apply?

- Graduates of: Engineering specialization with minimum degree of good

Prerequisites

These topics will be discussed with you in the interviews (Resources applicants can visit or study before interview)

- Programming Fundamentals at <https://www.edx.org/learn/computer-science/harvard-university-cs50-s-introduction-to-computer-science>
- OOP Fundamentals at <https://maharatech.gov.eg/course/index.php?categoryid=306>
- Web Fundamentals at maharatech.gov.eg/course/view.php?id=36
- Linux Fundamental at <https://maharatech.gov.eg/course/view.php?id=2155>
- Database Fundamentals at maharatech.gov.eg/course/view.php?id=740
- Python Fundamental at <https://maharatech.gov.eg/course/view.php?id=43>
- Introduction to Cloud and AWS at <https://skillbuilder.aws/learn/94T2BEN85A/aws-cloud-practitioner-essentials/8D79F3AVR7>
- ITI values at <https://iti.gov.eg/about-us>

Selection Process

- **Phase 1: IQ and Problem-Solving exam | English exam**
- **Phase 2: Technical Exam (C Programming, OOP, DB, Web Development→ Questions Level form basics to Intermediate)**
Computer-based technical exam in the field of your interest
- **Phase 3: Technical Interview**
Those applicants would be discussing with the interviewing panel their pre-work -“Before You Apply”- in a one-to-one interview
- **Phase 4: Interpersonal Skills Interview**
Those how pass phase 3 will be promoted to this interview

Delivery Approach

- 75% face to face Learning| 25 % Online
- Common Software: Red Hat Operating System and Docker

Students' Deliverables

- Graduation project.

Cloud Platform Development

1 Programs Offered

- ☑ **Professional Training Program:**
 - Cloud Platform Development
- ☑ **Intensive Code Camps:**
 - Python & DevOps

2 Industry/Academy Stakeholders

- RedHat Academy
- AWS

3 Targeted Outcome

- **Employability**
 - Vodafone Egypt
 - VOIS
 - EFG Holding
 - Etisalat Misr
 - PwC
 - AMAN Holding
 - Enza
 - Deloitte
 - Fawry
 - Advansys
 - Banque du Caire
 - DataScience

4 Certifications

- Red Hat Certified System Administrator
- AWS Certified Cloud Practitioner
- Kubernetes Administrator
- AWS Certified Solutions Architect – Associate

5 Graduates Job Profiles

DevOps Engineer

A DevOps Engineers combine an understanding of both engineering and coding from creating and implementing systems software to analyzing data to improve existing ones. They understand the software development lifecycle and have a clear understanding of various automation tools for developing digital pipelines.

Cloud Application Developer

You will understand how to work collaboratively to develop using DevOps tools, set up a database, deploy applications and scale them with Docker containers and Kubernetes, and manage their resources on a cloud platform.

Backend Developer

The back end developer is a programmer who creates components and features on the server-side, indirectly accessed by a user through a front end application or system. These developers are tasked with creating, maintaining, testing, and debugging the entire back end.

Cloud Platform Development

1050 Hours

Program Content Structure

Fundamental courses

- Track Orientation Workshop
- Agile Software Development Methodologies
- Client-Side Technologies
- Computer Network
- Data Structures and Algorithms
- Database Fundamentals
- HTML5 & CSS3 123
- Introduction to Programming
- Introduction to Software Engineering
- Object-Oriented Programming Concepts
- Operating Systems Fundamentals

Soft Skills Courses

- Communication Essentials for Professionals
- High Impact Presentations
- Job Seeking Skills
- Professional Demeanor (Workshop)
- Progressive Teamwork (Workshop)
- Freelancing

Core Courses

- Advanced Networking
- Amazon PaaS Web services
- Apache Web Server
- Application Containers
- Bash Shell Script
- Cloud Computing Fundamentals
- Configuration Management
- Continuous Delivery (Automation, Integration and Testing)
- Data centers: Storage, Network
- Enterprise Applications Architecture and Integration
- Google Cloud Platform
- Introduction to IoT
- Message Queuing
- Microservices Architecture
- MySQL Database
- Node.js
- NoSQL Database
- OpenShift
- OpenStack APIs
- Python Programming
- Red Hat System Administration I
- Red Hat System Administration II
- Red Hat System Administration III
- Terraform Cloud Remote State Management
- Unit & Automated Testing
- Version Control Systems
- Web Services
- Introduction to Generative AI and prompt engineering
- Generative AI for DevOps Engineers
