

CYBER SECURITY

The Cyber Security track equips students with the knowledge and skills to protect digital systems and networks. It covers key areas such as network security, ethical hacking, web & mobile penetration, and incident response. Through hands-on training and real-world projects, the track prepares graduates for careers in cybersecurity, helping organizations defend against cyber threats and ensure data integrity and privacy.

JOB PROFILES

**Cybersecurity Engineer • Cyber Threat Analyst •
Web Application Penetration Testers •
Mobile Application Penetration Testers •
Incident Responder and Digital Forensics Analyst • GRC Specialist**

Where graduates work

Certifications earned

- eWPT** — Web Application Penetration Tester
- eMAPT** — Mobile Application Penetration Tester
- eCIR** — Certified Incident Responder
- NSE 4** — Fortinet NSE 4 (Network Security Expert Level 4)

Selection process

01 IQ & English Exam

- Online exam covering problem-solving aptitude and English proficiency.

02 Technical Exam

- Computer-based assessment covering the program's core technical fundamentals.

03 Technical Interview

- Interview with the technical committee.

04 Interpersonal Interview

- Candidates who pass the technical interview are invited to this final stage.

Who may apply

Open to graduates in Computer Engineering, Communications Engineering, and Computer Science with a minimum grade of Good or higher.

Program content — 1,326 hours

CATEGORY	HOURS	SHARE	KEY COURSES
● Fundamental Courses	429 hrs	32%	Cisco Internetworking, Cisco Network Associate, Bash Shell Script, Client-Side Technologies Fundamentals, Database Fundamentals, Introduction to Generative AI and Prompt Engineering, Introduction to PHP Programming, Introduction to Programming, Introduction to Python Programming, Operating Systems Fundamentals, Microsoft Windows Infrastructure, Microsoft Windows Active Directory, Red Hat System Administration I
● Core Courses	540 hrs	41%	Metasploit Essentials, Ethical Hacking and Security Assessment, Firewalls Technologies, Introduction to Bug Hunting, Malware Analysis and Reverse Engineering, Mobile Penetration Testing, Operational Technology (OT) Security, Risk Assessment and Compliance, Web Penetration Testing, Computer and Network Forensics, Cyber Threat Hunting and threat intelligence, Active Directory Pentesting, Incident Handling, Application Security, AI Security, cloud security, SOC Fundamentals
● Soft Skills	57 hrs	4%	Communication Essentials for Professionals, High Impact Presentations, Job Seeking Skills, Professional Demeanor
● Graduation Project	300 hrs	23%	

Hands-on labs are conducted in-person. Online components cover theory and self-study modules on MaharaTech.

Student Deliverable

Every graduate must obtain an international certification relevant to their specialisation — eWPT, eMAPT, or eCIR — issued by ELearnSecurity, confirming professional readiness for the field.
