

AHMED FERGANEY

Data Analyst | Business Intelligence & Analytics Engineering

+20 1091657144 | ahmed.fergane707@gmail.com | Al-Qalyubia, Egypt | [linkedin.com/in/ahmed-fergane707](https://www.linkedin.com/in/ahmed-fergane707) | github.com/ahmedfergane707

PROFILE

Data professional with hands-on experience building star-schema data warehouses, ETL pipelines (SSIS), and Power BI dashboards that turn raw operational and production data into actionable KPIs. Strong SQL and Python foundation, with production experience designing dimensional models and DAX-driven reporting for manufacturing and customer-support-style analytics. Avid user of AI tools and automation to accelerate data workflows and reporting.

TECHNICAL SKILLS

Data Analysis & BI: Power BI (Data Modeling, DAX, Power Query, RLS), SQL Server, Data Cleaning, Data Visualization, KPI/Metric Design, Trend & Pattern Analysis

Data Engineering & Modeling: Dimensional Modeling (Star/Snowflake Schema), SSIS, SSRS, SSAS, Data Warehousing, Microsoft SQL Server, MongoDB, Query Optimization, Database Design

Mathematics & Statistics: Statistics, Linear Algebra, Numerical Optimization

AI & Machine Learning: Machine Learning, Deep Learning, LLM Engineering, AI Agents, Prompt Engineering, RAG, PyTorch, TensorFlow

Cloud & DevOps: Docker, Kubernetes, CI/CD Automation, Observability (Prometheus, Grafana)

Programming: Python, C, SQL, Bash, OOP, Data Structures & Algorithms

Tools: Power BI, MS Office, Git/GitHub, Postman, Jira, Trello

PROFESSIONAL EXPERIENCE

Product Engineer | Kandil Glass | 10th of Ramadan City, Egypt 06/2026 – Present

- Built an end-to-end analytics solution: modeled production data into a star-schema data warehouse with an SSIS ETL pipeline, and developed Power BI dashboards with DAX to track KPIs, uncover trends, and support data-driven decisions.

Operational Excellence Engineer | Midea Electric | 6th of October City, Egypt 01/2025 – 05/2026

- Analyzed operational data and built Power BI dashboards to track KPIs, downtime, and productivity trends across production lines.

Process Quality Engineer | Methode Electronics | Nasr City, Egypt 12/2023 – 12/2024

- Collected and analyzed quality data to identify defect trends, building Excel reports for cross-functional teams.

Continuous Improvement Engineer | Jac | Badr City, Egypt 03/2023 – 11/2023

- Applied data-driven analysis of production KPIs and process metrics to optimize manufacturing performance, improve OEE, and reduce defects.

PROJECTS

AdventureWorks Data Warehouse & Power BI Analytics | [GitHub](#)

- Designed a Kimball star-schema data warehouse (FactSales + 4 dimensions) from the AdventureWorks OLTP database.
- Built a full SSIS ETL package (Control Flow + Data Flow) to extract, transform, and load data; deployed to the SSIS Catalog and scheduled daily via SQL Server Agent.
- Developed Power BI dashboards with DAX measures (Revenue, YTD, YoY growth) covering sales trends, product performance, and territory analysis.

Customer Segmentation using Machine Learning | [GitHub](#)

- Segmented an automotive dataset using KMeans, Random Forest, and Linear Regression; applied feature engineering, outlier detection (DBSCAN), and PCA for actionable customer insights.

Transfer Learning for Image Classification | [GitHub](#)

- Implemented transfer learning pipelines using pre-trained models (ResNet, VGG, EfficientNet) with fine-tuning strategies, data augmentation, and hyperparameter optimization to achieve production-ready classification accuracy

Bilingual SMS Spam Classification (NLP) | [GitHub](#)

- Built a bilingual (Arabic/English) spam detection system using NLTK and scikit-learn with multiple vectorization methods and a validated Random Forest model.

Async Document Intelligence RAG System | [GitHub](#)

- Built a distributed FastAPI/Celery/RabbitMQ backend with a retrieval + reasoning pipeline (LLMs + vector search); optimized API latency to <150ms with async I/O and Redis caching.

Fine-Tuning LLMs for Arabic News Processing | [GitHub](#)

- Fine-tuned Qwen2.5-1.5B-Instruct with LoRA for structured entity extraction and translation; deployed a vLLM inference server with 80% GPU utilization.

EDUCATION

B.Sc. in Mechanical Engineering | Banha University | 2016 – 2022

- Academic Standing: Ranked 5th out of 120 in the Mechanical Engineering Department

CERTIFICATIONS

- Databases, CCNA, Cloud Computing, Docker, & Kubernetes — Udemy (2025)
- Statistics, Linear Algebra & Numerical Optimization — Dr. Hatem Elattar (2024)
- Machine Learning & Deep Learning Diploma — Eng. Hesham Asem (2024)
- Prompt Engineering & RAG — Eng. Abu Bakr Soliman (2026)
- AI Engineer Core Track (LLM Engineering, RAG, QLoRA, AI Agents) — Udemy (2026, in progress)

LANGUAGES & ADDITIONAL SKILLS

Languages: Arabic (Native), English (Professional), German (Basic)

Leadership: Cross-functional Team Leadership, Agile/Scrum Methodologies, Technical Mentoring, Problem-Solving Under Constraints
